

Pet Stop Fences have more than **8,000 Programmable Options!** Here are a few of them...

8,000 Programmable Options	Pet Stop makes the worlds most programmable and technologically advanced pet containment products.	24 Frequency Reliability	The Pet Stop OT 300 Transmitter offers 24 frequencies to choose from in case your neighbor installs a fence or if there is interference from CATV and satellite TV lines.
16 Possible Correction Levels	Pet Stop collars/receivers have at 10 Plus correction levels to ensure the most Gentle Training Possible.	StabiliTemp™	Pet Stop fences have the ability to keep the signal stable during climate changes.
Integrated Remote Trainer	Pet Stop innovation has created a remote control trainer that works with the hidden fence system.	PerfectMatch™	If you have more than one pet, the system allows for separate sensitivity, correction level and programming settings.
Auto-Adjusting Progressive Correction Levels	Pet Stop collars/receivers auto adjust to the correction level your pet needs - when it needs it.	Wire Check™	All Pet Stop transmitters will automatically adjust the power output to adjust for wire length or any wire problems and keep the signal field constant.
Digital Signal Technology	Pet Stop transmitters emit a pure digital signal. The safest signal technology for your pet.	Wireless Electronic Switching	The transmitter and receiver use fail safe Electronic Switching for programming. (Rather than a cheaper magnetic system)
Behavior Response Programming	The collar/receiver & transmitter create a Smart Zone that will change programs and correction levels while your pet is moving through or toward the fence boundary.	Lightning Monitor & Alarm	The transmitter has a Lightning Monitor and Alarm. Should it ever take a hard hit, you would know it right away.
Programmable Fail Safe Speed Zone	The collar/receiver has a Fail Safe Zone that recognizes when your pet is moving through the signal field at a high speed.	Compatible With Most Brands	The transmitter/receiver is compatible with transmitters/receivers from most other brands.
Rubberized Soft Comfort Contacts	Pet Stop is the only company in the world to use Completely Rubberized Contacts to protect your pet's sensitive skin.	Buy Batteries Where You Want	You can buy your own batteries without your product warranty being voided.
Soft Spring Loaded Contacts	Pet Stop collars/receivers have Soft Spring Loaded Contacts to reach through long fur and maintain contact while the neck muscles expand and contract.	Change Correction Levels	Change Correction Level Settings wirelessly, simply at the touch of a button.
Three Omni-Directional Antennas	Pet Stop collars/receivers have Three Omi-Directional Antennas for the most consistent reception of any brand.	Lightning Arrest Technology	Pro Hidden Fence systems employ modern surge protection made by an industry leading company (Rather than old fashioned lightning rods).
12X Battery Check™	Pet Stop receivers run a complete battery scan every two hours so that you can be warned of a low battery in advance.	Money Back Guarantee	Pro Hidden Fence offers a 100% Money Back Containment Guarantee.
No-Run-Through	The collar/receiver has an adjustable No-Run-Through program setting that will stop the most determined pets.	Independently Certified Training	Pro Hidden Fence is Independently Certified to boundary train pets by a the International Association of Canine Professionals (IACP).
Flashing Low-Battery Light	All Pet Stop receivers have a Flashing Low-Battery Light to give you ample warning when it's time to replace a battery.	Built in the U.S.A.?	Pet Stop products are Built in the U.S.A. (Rather than manufactured over-seas (China))
